Design Intern

SpaceRyde

At SpaceRyde, we use balloons to launch small satellites. Our work is literally rocket science and we are looking for creative people to join us. Watch the video of our first flight, and Canada's first-ever space launch system for small satellites here: https://ca.linkedin.com/company/spaceryde

Please email your resume and design portfolio to jobs@spaceryde.com

Key Responsibilities

Website design:

- Conduct research on web design standards for the space industry.
- Design and create a new company website using a drag and drop tool such as Wix. Take into consideration user experience and function, compatibility with browsers, devices, and operating systems
- Work closely with the operations team to gather the necessary information for the website design and development
- Develop a simple step-by-step guide on how to modify the website

Other design work:

- Create renders of SpaceRyde's launch vehicle
- Create designs for promotional merchandise
- Create icons for website

Requirements

Enrolled in a College/University program in digital design, user interface design, web development or related field and 1+ years of relevant experience

Previous experience with websites builders such as Wix or similar

Basic knowledge of the Search Engine Optimization process
